

AMENDMENTS TO THE SPECIFICATION

On page 1, after the title, please insert the following heading:

FIELD OF THE INVENTION

On page 1, after line 8, please insert the following heading:

BACKGROUND OF THE INVENTION

On page 3, after line 2, please insert the following heading:

BRIEF DESCRIPTION OF THE INVENTION

On page 4, after line 7, please insert the following heading:

BRIEF DESCRIPTION OF THE FIGURES

On page 4, please amend the paragraph beginning at line 34 as follows:

The installation further comprises ventilation means combining natural ventilation with intermittent forced ventilation 3c. It also comprises regulating means comprising sensors measuring the temperature of the sludge 3 to be dried (3a), the air temperature respectively inside (3b) and outside the greenhouse 1 and the humidity of this air (3c), these various sensors (not shown in the drawings because they are conventional means well known to a person skilled in the art) actuating mobile louvers 5 and 6 which are provided on the walls of the greenhouse, respectively at the bottom and top portion thereof, in order to regulate the natural convection which removes the moisture-laden air, either naturally or by forced ventilation. This system can be supplemented by programming and automation means 3d, making it possible, for example, to program a week of operation.
